

Microsoft Access 2016 Database Development Project

Project Title	Microsoft Access 2016 Database Development Project
Project Summary	Develop a database in Microsoft Access 2013 that will support the details of a course catalog.
Country	United States
Agency	Department of State
DoS Office	FSI/SAIT/RLD
Post	N/A
Section	N/A
Number of Interns	3

Project Description

This is a great opportunity to use relational database design and development skills to create a database in Microsoft Access. This project will require a basic to intermediate level of MS Access proficiency. In essence, each course will have a large quantity of information associated with the course, but the information will be managed through the separate queries that are generated by the user.

Desired Skills Interests

Additional Information

The design and development skills used for this project will easily transfer to other organizations that have a course or product catalog.

Language Requirements

None
